

I'D NEVER LET A MICRON OF DIRT COME BETWEEN US.

Purolator PureONE oil filters use micronic filtration to trap the smallest particles of dirt. They're also the only filters on the market to be 99.9% efficient. Engineered with durable metal end caps to ensure dirty oil passes through the filter media to prevent premature engine wear. Not to mention, they're 100% covered with textured grip control for easy installation. **Keep microns trapped. Keep it pure. With Purolator PureONE.**
